

Vacancy Chief Engineer

From end of December 2026

The Ship

The Clipper Stad Amsterdam is built on the initiative of Randstad and the municipality of Amsterdam. The ship sails as a passenger vessel under Dutch flag. She has authentic square sails and a sharp bow. On the 60 meter long deck the passengers can enjoy the rigging, the enormous yards and the almost endless amount of lines. The ship has 14 luxury passenger cabins and a spacious long room for diners and presentations. The ship is available for business events, luxury cruises and adventurous sailing-trips for individuals.

The Position

The technical department of the Clipper is run by two persons, the Chief engineer and a 2nd engineer. As Chief Engineer you report directly to the captain and superintendent.
